USE CASES

Report Generation

Use Case Title: Income vs. cost report generation
Primary Actor: Athletic Administrator
Level: Kite
Stakeholders: Administrators, athletic directors, university executives
Precondition: <ol style="list-style-type: none"> 1. Administrator's device must meet the minimum software and hardware requirements in order to run the report 2. Administrator received all necessary training on how to use the report generation feature 3. Administrator is authenticated and has appropriate access rights for the report generation 4. The financial data is available, current and accurate

<ol style="list-style-type: none"> 5. The financial data is organized in a way that supports report generation for a particular time period 6. Security policies and protocols regarding financial data have been established by the University of Utah 7. Privileges have been assigned to users, so that only the Administrators, athletic directors and university executives have access to the report generation system
Minimal Guarantee: <ol style="list-style-type: none"> 1. The system will be able to generate the income vs. cost reports (based on criteria selected) and it will be accessible to the administrator 2. The report will be in the correct format 3. The report will accurately reflects the financial data for the defined period 4. The report will be generated within a reasonable amount of time after the process is initiated 5. The system will notify the administrator of any issues via an error message 6. The information will be secure and compliant per the security protocols and policies established by the University of Utah
Success Guarantees: <ol style="list-style-type: none"> 1. For a desired date range, the report will provide detailed insights into the Athletic Department's incomes and expenses based on the report type selected 2. The report will be printable into Excel, pdf and csv formats
Trigger: Administrator selects the date or date range of interest, selects the report type, file type, and uses the "Generate Reports" function on the website portal to create the report
Main Success Ratio: <ol style="list-style-type: none"> 1. Administrator logs into the Athletic Department's website portal and goes to the Reports tab 2. Administrator selects the dates, report format, and runs the report 3. The system pulls data from the database and generates the report 4. The report will be automatically downloaded onto the Administrator's computer
Extensions: <ol style="list-style-type: none"> 1. When the report is successfully generated, there is an alert which states, "Success! View report here." 2. Date range is missing <ol style="list-style-type: none"> a. System alerts and prompts Administrator to enter the Start and End dates 3. Report format is not selected <ol style="list-style-type: none"> a. System alerts and prompts Administrator to select the Report Format 4. File type is not selected <ol style="list-style-type: none"> a. System alerts and prompts Administrator to select the File Type 5. The database from which reports are generated is not available <ol style="list-style-type: none"> a. System alerts Administrator of System Error and to contact IT b. Administrator files a ticket with IT 6. Timeout while accessing the data <ol style="list-style-type: none"> a. System alerts Administrator to refresh page, log back in and try again b. Administrator refreshes page, logs in and runs the report again

Team Rankings

Use Case Title: Team Ranking Management (View/Add/Update/Delete team ranks)

Primary Actor: Athletic administrator
Level: Kite
Stakeholders: Athletic administrators
Preconditions: Employees need to be authenticated and need necessary permissions to manage the team ranking.
Minimal Guarantee: System remains stable and responsive while managing the team, University Administrators.
Success Guarantees: Correct team ranking information is added, updated, viewed, or deleted from the system.
Trigger: Employee chooses to manage team ranking information from the main dashboard > Teams.
Main Success Scenario: <ol style="list-style-type: none"> 1. Employees must select Team Ranking Management option on the web interface present under teams. 2. The system displays all the team's rankings. With the option to add, delete, and update. 3. The user can select the desired option. 4. For add and update a form is displayed to enter or edit the team ranking details. 5. Employees submit the form, and the data is validated by the system. 6. Systems confirms successful addition or updating of the team ranking to the user. 7. For delete confirmation dialog is shown and proceeds to delete once confirmation is given.
Extensions: <ol style="list-style-type: none"> 1. Invalid data during add/update. <ol style="list-style-type: none"> a. System displays an error message. b. Employees correct the data and resubmit. 2. Employee selects delete option. <ol style="list-style-type: none"> a. System asks for confirmation to prevent accidental deletion. 3. Employee confirms and system proceeds to delete the team ranking. <ol style="list-style-type: none"> a. System timeout or failure 4. System logs the error and prompts the user to try again. <ol style="list-style-type: none"> a. Employee is returned to the dashboard. b. Employee modifies the team ranking information or cancels the operation.

Team

Use Case Title: Team Management (View/Add/Update/Delete teams)
Primary Actor: Athletic administrator
Level: Kite
Stakeholders: Coaches, Team Manager, Athletes, Athletic administrators
Preconditions: Employees need to be authenticated and need necessary permissions to manage the team.
Minimal Guarantee: System remains stable and responsive while managing the team, University Administrators.
Success Guarantees: Correct team information is added, updated, viewed, or deleted from the system.
Trigger:

Employee chooses to manage team information from the main dashboard.
Main Success Scenario: <ol style="list-style-type: none"> Employees must select Team Management option on the web interface. System displays all the teams. With the option to add, delete, and update. The user can select the desired option. For add and update a form is displayed to enter or edit the team details. Employees submit the form, and the data is validated by the system. Systems confirms successful addition or updating of the team to the user. For delete confirmation dialog is shown and proceeds to delete once confirmation is given.
Extensions: <ol style="list-style-type: none"> Invalid data during add/update. <ol style="list-style-type: none"> System displays an error message. Employees correct the data and resubmit. Employee selects delete option. <ol style="list-style-type: none"> System asks for confirmation to prevent accidental deletion. Employee confirms and system proceeds to delete the team. <ol style="list-style-type: none"> System timeout or failure System logs the error and prompts the user to try again. <ol style="list-style-type: none"> Employee is returned to the dashboard. Employee attempts to add a team that already exists: <ol style="list-style-type: none"> System notifies the employee about the duplicate entry. Employee modifies the team information or cancels the operation.

Employee

Use Case Title: Managing Employee Information (Add/Update/Delete/Search employee information, including salary)
Primary Actor: Athletic Administrator
Level: Kite
Stakeholders: Athletic Administrator, Employees, Coach, Athletic Directors
Precondition: <ol style="list-style-type: none"> The system is condition for authenticated user The system has been properly configured with the relevant employee credentials approval workflows. The system has access to the necessary employee performance data or metrics.
Minimal Guarantee: The system will allow user to successfully dd/delete/view/modify employee information
Success Guarantees: Employee credentials is accurately search for, added, or deleted in the system
Trigger: Access to employee dashboard would require Athletic Administrator credentials to successfully login and click on the Employees tab
Main Success Ratio: <ol style="list-style-type: none"> The Athletic Administrator input login credentials without warning errors System displays a list of current employees upon clicking on Employees tab

<ol style="list-style-type: none"> 3. Athletic Administrator selects an employee to add or delete or edit 4. System prompts to add or delete employee credentials 5. Athletic Administrator enters the updated employee credentials 6. System saves the changes and confirms the successful update.
Extensions: <ol style="list-style-type: none"> 1. User login in wrong credentials <ol style="list-style-type: none"> a. System displays a warning sign when wrong credentials is entered and requests valid information

Athlete

Use Case Title: Athlete Information Management (View/Add/Update/Delete athletes' information)
Primary Actor: Employee
Level: Kite level
Stakeholders: Athletic Directors, University Executives
Precondition: <ol style="list-style-type: none"> 1. The Employee has been authenticated and has the appropriate authorization to manage athlete information. 2. Athlete information exists in the system for viewing and updating, including the scholarship information, or a need to enter new athlete information.
Minimal Guarantee: An employee can view/add/update/delete an athlete and their information.
Success Guarantees: Athlete information is accurately added, viewed, updated, or deleted in the system.
Trigger: The Employee selects the option to manage athlete information from the system menu.
Main Success Ratio: <ol style="list-style-type: none"> 1. Employee logs into the system. 2. Employee selects the 'Athlete Management' module. 3. Employee chooses to Add, View, Update, or Delete athlete information. 4. Employee completes the necessary input fields with the athlete's information, including personal details, team affiliation, and scholarship status. 5. The system validates and saves the new or updated information, ensuring that all required fields are complete and correct. 6. The system confirms the successful completion of the action to the Employee. 7. Employee logs out or performs another transaction.
Extensions: <ol style="list-style-type: none"> 1. Required fields are missing or data entered is invalid. <ol style="list-style-type: none"> a. System prompts Employee to correct the information. b. Employee revises the data and resubmits. 2. System error occurs when saving the athlete information. <ol style="list-style-type: none"> a. System displays an error message and logs the incident. b. Employee retries the action, or if the problem persists, contacts technical support.

Equipment

Use Case Title: Equipment management (View/Add/Update/Delete equipment)
Primary Actor: Employee
Level: Kite Level
Stakeholders: Athletic Directors
Precondition: The equipment list from which the equipment is to be chosen by the authenticated system user should be updated with the available number of equipment of each kind.
Minimal Guarantee: The employee can view/add/update/delete a piece of equipment which has been purchased, disposed of and/or inventoried.
Success Guarantees: The employee should be able to view the available equipment, select the item, add it to the cart, adjust the count of ordered equipment, proceed to transaction, successfully place the order.
Trigger: The Equipment page can be accessed by clicking the Equipment tab from the main landing page after a successful login.
Main Success Scenario: <ol style="list-style-type: none"> 1. User receives a successful transaction email. 2. The inventory count is updated to the latest available number of equipment of each kind.
Extensions: <ol style="list-style-type: none"> 1. User places order for something which says 'Available' in the system but is actually not. 2. User never receives confirmation of the order. 3. The equipment search function is not available and the user has to scroll through several items.

Team Income

Use Case Title: Team income management (View/Add/Update/Delete team income information)
Primary Actor: Employee
Level: Kite level
Stakeholders: Board members, Athletic Directors, University Executives
Precondition: <ol style="list-style-type: none"> 1. The Employee must be authenticated with access rights to the financial data entry system. 2. Relevant income data from multiple sources of income (donation, state, university, TV networks) in addition to event/game payouts for the specific team is available and ready for entry.
Minimal Guarantee: The income record is added successfully to the income table and is reflected in the Income Source table.
Success Guarantees: <ol style="list-style-type: none"> 1. The income data for the team can be entered, viewed, updated and deleted in the system correctly 2. The income data is available for reporting and analysis

Trigger: Logging into the Athletic Department's website portal, navigating to a team's page, and clicking on the Income tab.
Main Success Ratio: <ol style="list-style-type: none"> 1. Employee logs into the Athletic Department's website portal. 2. Employee navigates to a sport team's page. 3. Employee clicks on "Add new income", selects the income source, edits the date, and enters the amount. 4. The system validates the data for format and completeness. 5. If validation is successful, the system processes and adds a new line to the Income table. 6. The system confirms the successful transaction to the Employee. 7. Employee logs out or continues with other tasks.
Extensions: <ol style="list-style-type: none"> 1. The employee can edit or delete a record. 2. If deletion option is selected, the system asks "Yes or No" to verify. 3. Incorrect or incomplete income data is submitted (issues with income source, date, or amount) <ol style="list-style-type: none"> a. System displays an error message. b. Employee revises the data and resubmits. 2. The system is unable to process the income data due to a technical issue. <ol style="list-style-type: none"> a. System displays an error message. b. Employees attempt to re-enter the data or contact technical support if the problem persists.

Event for a Team

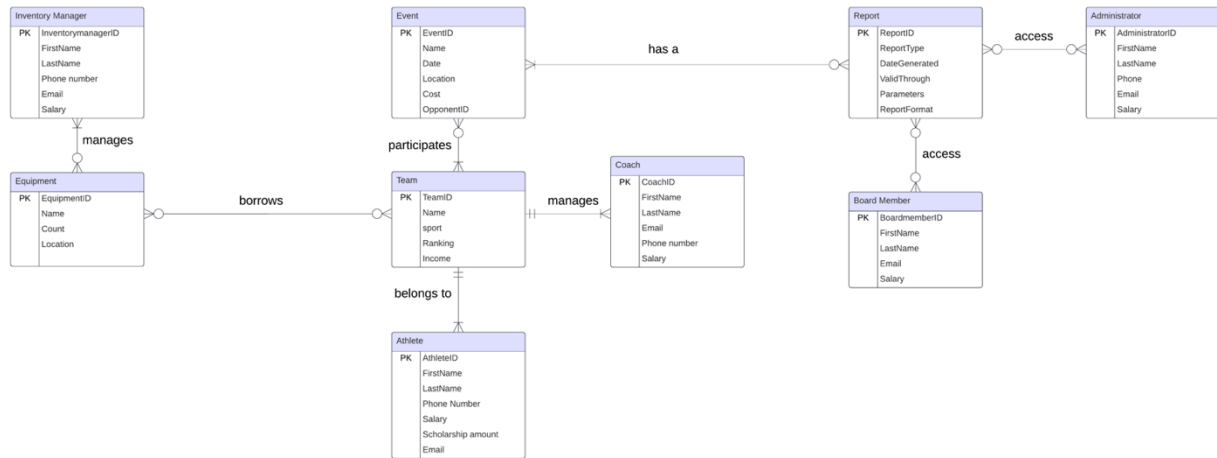

Use Case Title: Event management (View/Add/Update/Delete event information for a specific team)
Primary Actor: Employee
Level: Kite Level
Stakeholders: Athletic Directors
Precondition: <ol style="list-style-type: none"> 1. The employee should be able to view/add/update/delete the event for the university. 2. Any changes in the event schedules should be updated across the systems in a calendar.
Minimal Guarantee: <ol style="list-style-type: none"> 1. The most recent event changes should be viewable in the system. 2. Employees should be able to edit the event and add a new one.
Success Guarantees: <ol style="list-style-type: none"> 1. The user is able to successfully make changes to the event time, duration, name, location. 2. An update alert is sent to everyone (employees, executives, board members, athletic directors, athletes, audience) concerned with the event.
Trigger: An event for a team can be viewed/added/modified/removed after the Employee navigates to the Team's page and clicks on the Team Events tab.

Main Success Scenario:
User successfully views the recent events, adds an event, makes changes to the existing ones if required, deletes the events if it comes to it.
Extensions:
Users make two events for the same day, date, time and location as the recent changes were not reflected across the system.

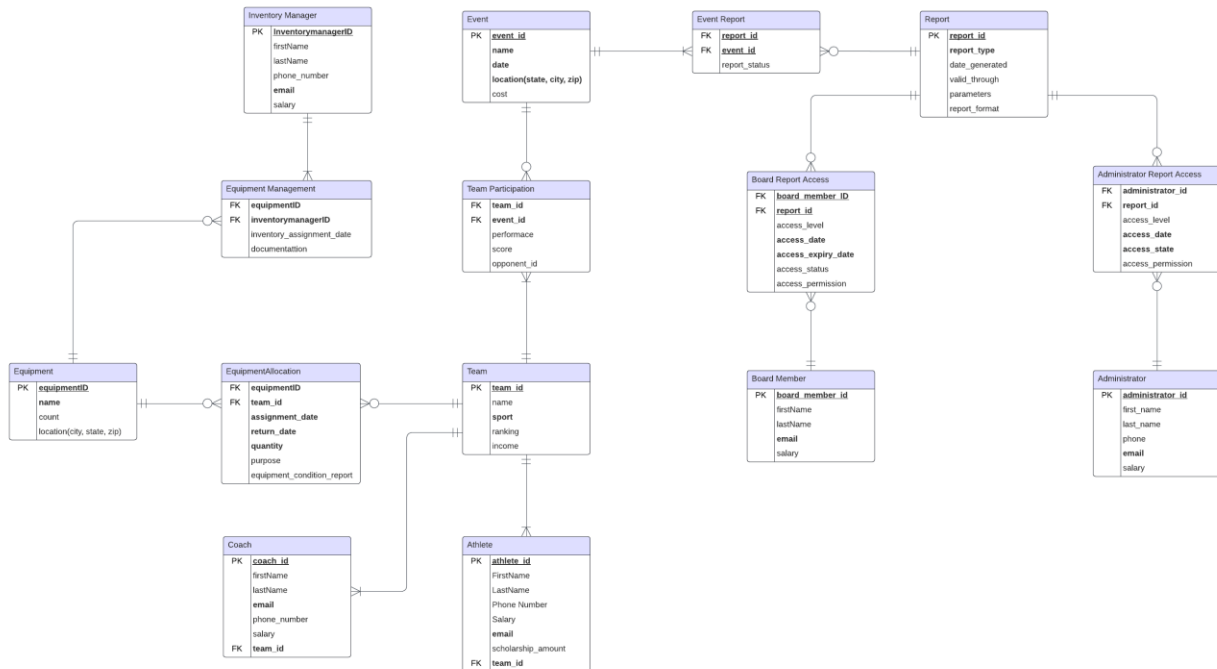

Post Ranking for a Team

Use Case Title: Team ranking management (View/Add/Update/Delete team rankings)
Primary Actor: Athletic Administrator
Level: Kite
Stakeholders: Coaches
Preconditions: Employees need to be authenticated and need necessary privileges to manage team ranking.
Minimal Guarantee: System remains stable and responsive while posting ranking information.
Success Guarantees: Correct ranking information is added, updated, viewed, or deleted from the system.
Trigger: Employee logs in, navigates to a desired Team's page and clicks on Rankings tab.
Main Success Scenario: <ol style="list-style-type: none"> 1. Employees must select 'Rankings' option on the web interface. 2. The system displays all the rankings. With the option to add, delete, and update. 3. The user can select the desired option. 4. For add and update a form is displayed to enter or edit the ranking details. 5. Employees submit the form, and the data is validated by the system. 6. Systems confirms successful addition or updating of the ranking to the user. 7. For delete confirmation dialog is shown and proceeds to delete once confirmation is given.
Extensions: <ol style="list-style-type: none"> 1. Invalid data during add/update. <ol style="list-style-type: none"> a. System displays an error message. b. Employees correct the data and resubmit. 2. Employee selects delete option: <ol style="list-style-type: none"> a. System asks for confirmation to prevent accidental deletion. b. Employee confirms and system proceeds to delete the team. 3. System timeout or failure <ol style="list-style-type: none"> c. System logs the error and prompts the user to try again. d. Employee is returned to the dashboard. 4. Employee attempts to add a ranking information that already exists: <ol style="list-style-type: none"> a. System notifies the employee about the duplicate entry. b. Employee modifies the ranking information or cancels the operation.
